LIST OF CONTENTS
VOLUME 9 (1986)

Number 1

V. W. Pentreath, L. H. Seal, J. H. Morrison and P. J. Magistretti	1	Commentary: Transmitter mediated regulation of energy metabolism in nervous tissue at the cellular level
F. Mehraban, A. Haines and J. O. Dolly	11	Monoclonal and polyclonal antibodies against dendrotoxin: their effects on its convulsive activity and interaction with neuronal acceptors
Lewis C. Mokrasch	23	Fluctuations in the glutathione content of confluent cultured astrocytes and glioma cells
Marco Virgili, Alessandro Poli, Antonio Contestabile, Paolo Migani and Ottavio Barnabei	29	Synaptosomal release of newly-synthetized or recently accumulated amino acids. Differential effects of kainic acid on naturally occurring excitatory amino acids and on [D-^{3}H]aspartate
Neville N. Osborne	35	Neurotensin in the retina: identification, release and receptor analysis
F. De Vitry, J. Catelon, M. Dubois, J. Thibault, D. Barritault, J. Courty, S. Bourgoin and M. Hamon	43	Partial expression of monoaminergic (serotoninergic) properties by the multipotent hypothalamic cell line F7. An example of learning at the cellular level
B. Nyström, A. Hamberger and J.-O. Karlsson	55	Changes of extracellular proteins in hippocampus during depolarization
J. A. Nielsen	61	Effects of chronic antidepressant treatment on nigrostriatal and mesolimbic dopamine autoreceptors in the rat
E. M. V. de Cavanagh, F. Dominguez, J. M. Pasquini and E. F. Soto	69	*In vivo* incorporation of [U-^{14}C]glycerol and [2-^{3}H]glycerol into phospholipids of brain subcellular fractions in normal and malnourished animals
Enrique Brandan, Isabel Llona and Nibaldo C. Inestrosa	75	Heparin-acetylcholinesterase interaction: specific detachment of class I-A forms and binding of class I and II-A forms to heparin-agarose
E. Torre and M. E. Celis	85	Alpha-MSH injected into the substantia nigra or intraventricularly alters behavior and the striatal dopaminergic activity
Kinya Kuriyama and Shoichi Tomono	91	Significance of the enhancement of GABA receptor binding with low affinity in the assessment of central effects of benzodiazepine derivatives: analysis using a 1H-1,2,4-triazolyl benzophenone derivative (450191-S)
Stephen J. Lewis, Max R. Fennessy, Anthony J. M. Verberne, Bevyn Jarrott and David A. Taylor	99	The effects of Δ^9-tetrahydrocannabinol (Δ^9-THC) on the regional concentrations of spermidine in the rat brain
Haydee Torres, Jean-Louis Charli, Alfonso González-Noriega, Miguel Angel Vargas and Patricia Joseph-Bravo	103	Subcellular distribution of the enzymes degrading thyrotropin releasing hormone and metabolites in rat brain
Jean-Pierre Toutant	111	An evaluation of the hydrophobic interactions of chick muscle acetylcholinesterase by charge shift electrophoresis and gradient centrifugation
L. J. Martin, J. A. Doebler and A. Anthony	121	Perikaryal RNA changes within neurons of the caudate-putamen and substantia nigra in soman intoxicated rats

L. J. Martin, J. A. Doebler and A. Anthony	121	Perikaryal RNA changes within neurons of the caudate-putamen and substantia nigra in soman intoxicated rats

Contents

Herbert Stadler and Thomas Nesselhut	127	Simple and rapid measurement of acetylcholine and choline by HPLC and enzymatic-electrochemical detection
Miklós Palkovits	131	Neuropeptides in the median eminence
G. Fink	141	The external layer of the median eminence: a neurovascular synapse
Kjell Fuxe, Kurt Andersson, Anders Härfstrand, Luigi F. Agnati, Peter Eneroth, Ann Marie Janson, Wylie Vale, Michael Thorner and Menek Goldstein	155	Medianosomes as integrative units in the external layer of the median eminence. Studies on GRF/catecholamine and somatostatin/catecholamine interactions in the hypothalamus of the male rat
Patrick V. Russo and Arnold J. Mandell	171	Sonication, calcium, and peptides have systematic effects on the nonlinear dynamics of tyrosine hydroxylase activity
Richard McCarty and Laura M. Plunkett	177	Forebrain binding sites for atrial natriuretic factor: alterations in spontaneously hypertensive (SHR) rats
Steven F-L. Huang and Grace Y. Sun	185	Cerebral ischemia induced quantitative changes in rat brain membrane lipids involved in phosphoinositide metabolism
Dinah Weissmann, Evelyne Mach, Claude Oberlander, Yanick Demassey and Jean-François Pujol	191	Evidence for hyperdensity of 5HT1B binding sites in the substantia nigra of the rat after 5,7-dihydroxytryptamine intraventricular injection
	201	Meeting Report
	205	Book Reviews
	207	News Items
	I	Software Survey Section

Number 2

C. P. Downes	211	Review: Agonist-stimulated phosphatidylinositol 4,5-bisphosphate metabolism in the nervous system
R. H. Michell	231	Critique: Inositol lipid-mediated signalling in the nervous system
R. E. Anderson	235	Critique: Phosphoinositide metabolism in photoreceptor cells
Giancarlo Poiana, Fiorella Leone, Alan Longstaff, Gianfranco Scarsella and Stefano Biagioni	239	Muscle acetylcholinesterase in childhood myopathies
Fatima Montiel, Louis Sarliève, Angel Pascual and Ana Aranda	247	Multihormonal control of proliferation and cytosolic glycerol phosphate dehydrogenase, lactate dehydrogenase and malic enzyme in glial cells in culture
Jolanta Ulas, Malgorzata Gradkowska, Maria Jezierska, Malgorzata Skup, Jolanta Skangiel-Kramska and Barbara Oderfeld-Nowak	255	Bilateral changes in glutamate uptake, muscarinic receptor binding and acetylcholinesterase level in the rat hippocampus after unilateral entorhinal cortex lesions
C. Sato, M. Schriftman and J. N. Larocca	265	Transport of sulfatides towards myelin. Effect of colchicine, monensin and calcium on their intracellular translocation
E. L. Conway, C. Maccarrone, B. Jarrott and W. J. Louis	273	Comparison of β-endorphin immunoreactivity in hypothalamic and brainstem nuclei of normotensive and age-matched hypertensive rat strains

Contents

A. Togari, T. Murakami, T. Oshima, K. Fujita and T. Nagatsu	281	Effects of polyamines on tyrosine hydroxylase activity in adrenals
S. C. R. Lummis and D. B. Sattelle	287	Binding sites for [^{3}H]GABA, [^{3}H]flunitrazepam and [^{35}S]TBPS in insect CNS
J. R. Yandrasitz, G. Berry, V. M. Cipriano, S.-M. Hwang and S. Segal	295	Effect of elevated potassium on phospholipid and inositol metabolism of isolated nerve endings
Tatsuo Suzuki, Taiji Kato, Toshihiro Fujii and Ryo Tanaka	305	Cytoskeletal changes of glioblasts after morphological differentiation induced by glia maturation factor
Paul Reichert and Paul-Francis Urban	315	Purification and properties of rat brain cysteine sulfinate decarboxylase (EC 4.1.1.29)
Alain Friboulet, Danièle Goudou and François Rieger	323	Interaction of a bisquaternary ammonium compound with the peripheral organophosphorus (POP) site on acetylcholinesterase
Phillip J. Birch, Shelagh M. P. Anderson and Marianne Fillenz	329	Mild chronic stress leads to desensitisation of presynaptic autoreceptors and a long-lasting increase in noradrenaline synthesis in rat cortical synaptosomes
Andrew B. Norman, George Battaglia and Ian Creese	337	Regulation of putative muscarinic cholinergic receptor subtypes in rat brain
	349	Book Reviews
	351	News Items
	355	Erratum
	I	Software Survey Section

Number 3

William E. Heydorn, G. Joseph Creed, Jitendra Patel and David M. Jacobowitz	357	Distribution of proteins in different subcellular fractions of rat brain studied by two-dimensional gel electrophoresis
M. A. Mena, A. Zorzano and E. Herrera	371	Acute effects of ethanol on brain, plasma and adrenal monoamine concentrations in virgin and pregnant rats and their fetuses
John E. Taylor and Francis V. DeFeudis	379	Interactions of verapamil, D 600, flunarizine and nifedipine with cerebral histamine receptors
A. Gossuin, J. M. Maloteaux and A. Trouet	383	Benzodiazepine receptors on cultured neurons: binding with different [^{3}H]ligands on homogenized and intact cells
D. P. Lotshaw, H. Z. Ye and C. Edwards	391	Endocytosis of surface bound dopamine β-hydroxylase and plasma membrane following catecholamine secretion by bovine adrenal chromaffin cells
Akira Hirata, Ichimaro Yamada, Norihisa Fujita, Kihachi Saito, Masanobu Nakahiro and Hiroshi Yoshida	401	Endogenous modulator of dopamine receptor(s)
Mahnaz Badamchian, K. John Morrow Jr and Paul T. Carroll	409	Immunological, isoelectric, hydrophobic and molecular weight differences between soluble and ionically membrane-bound fractions of choline-O-acetyltransferase prepared from mouse and rat brain
J. A. Nielsen	423	Metergoline, pirenperone and pizotifen alter dopamine and 5-hydroxytryptamine synthesis in discrete rat brain nuclei
A. J. Cross, G. P. Reynolds, L. M. Hewitt and P. Slater	431	Brain serotonin receptors in Huntington's disease

Contents

Clinton D. Kilts and Carl M. Anderson	437	The simultaneous quantification of dopamine, norepinephrine and epinephrine in micropunched rat brain nuclei by on-line trace enrichment HPLC with electrochemical detection: distribution of catecholamines in the limbic system
W. Wesemann, N. Weiner and P. Hoffmann-Bleihauer	447	Modulation of serotonin binding in rat brain by membrane fluidity
Phillip J. Robinson and Walter Lovenberg	455	Dopamine and serotonin in two populations of synaptosomes isolated by percoll gradient centrifugation
	459	Book Review
	461	News Items
	I	Software Survey Section

Number 4

T. V. Waehneldt, J.-M. Matthieu and G. Jeserich	463	Commentary: appearance of myelin proteins during vertebrate evolution
Shinji Soeda, Katsumi Miyazaki and Yasuo Kishimoto	475	Long-chain and very long-chain fatty acyl-CoA synthetase activity in microsomes of jimpy mouse brain
Gábor L. Kovács, Mária Faludi, György Falkay and Gyula Telegdy	481	Peripheral oxytocin treatment modulates central dopamine transmission in the mouse limbic structures
E. T. McNeal and J. W. Daly	487	The sodium channel in membranes of electroplax. Binding of batrachotoxinin-A [^{3}H]benzoate to particulate preparations from electric eel (*Electrophorus*)
Kjell Hole, Patrick V. Russo and Arnold J. Mandell	493	The influence of neuropeptides on amine synthesis: cholecystokinin-8 and neurotensin reduce striatal tyrosine hydroxylase activity
Shantilal N. Shah, Ronald C. Johnson and Ingming Jeng	499	Cholesterol ester concentrations and the ester hydrolases in cultured gioblastoma cells: effect of lipoprotein depleted serum
J. Nemcsók, É. Vig, K. Halasy, É. Fekete and I. Benedeczky	505	Localization and quantitative distribution of biogenic monoamines in the intestinal tract of locust, snail and carp
K. Muralidhar, Sara Rani Marcus, M. V. Chandrakala, H. A. Nadiger and B. Sadasivudu	511	Acute metabolic effects of taurine on the enzymes metabolizing glutamate and GABA
Marie T. Filbin and Shirley E. Poduslo	517	A sensitive immunotransfer method for the detection of oligodendroglial plasma membrane antigens
Yukio Yoneda, Kiyokazu Ogita, Hiromichi Nakamuta, Masao Koida, Takao Ohgaki and Haruo Meguri	521	Possible interaction of [^{3}H]glutamate binding sites with anion channels in rat neural tissues
Judith M. B. Pinto and Timothy J. Maher	533	Tyrosine availability prevents tyramine-induced tachyphylaxis in the isolated rat heart
Ole Nybroe, Ann Gibson, Claus J. Møller, Hanne Rohde, Jan Dahlin and Elisabeth Bock	539	Expression of N-CAM polypeptides in neurons
G. Konat, G. Gantt and E. L. Hogan	545	Acylation of myelin proteolipid protein in subcellular fractions of rat brainstem
M. Hadjiconstantinou, J. C. Papademetriou and N. H. Neff	551	Differentiation of noradrenergic and dopaminergic neurons in the cardiovascular system

Contents

Gary L. Wenk, Kathrin L. Engisch, Lisa D. McCall, Susan J. Mitchell, Thomas G. Aigner, Robert L. Struble, Donald L. Price and David S. Olton

557 [^{3}H]Ketanserin binding increases in monkey cortex following basal forebrain lesions with ibotenic acid

563 Book Reviews

SUBJECT INDEX

Acceptors: interaction with dendrotoxin 11
Acetaldehyde: levels in blood and amniotic fluid 373
Acetylation: of nyelin proteolipid protein 545
Acetylcholine: measurement by HPLC and electrochemical detection 127
Acetylcholinesterase: action of MPT 323
  characteristics from chick muscle 111
  heparin interaction 75
  hydrophobic interactions 111
  inhibitors 323
  of muscle 239
Acetylcholinesterase level: in hippocampus 255
Acyl-CoA synthetase: activity in microsomes 475
Adrenal: chromaffin cells 391
  monoamine concentrations 371
Adrenals: tyrosine hydroxylase activity 281
Adrenaline: analysis by HPLC and electrochemical detection 437
Amine synthesis: influence of neuropeptides 403
Amino acids: in synaptosomes 29
  synthesis and accumulation in synaptosomes 29
Amniotic fluid: ethanol and acetaldehyde levels 373
Anion channels 521
Anion dependent binding 522
Antidepressant: effect of chronic treatment 61
Antidepressants: effect on dopamine autoreceptors 61
Antigens: to oligodendroglial 517
[^{3}H]Apomorphine: binding 401
Aspartate aminotransferase 512
[D-^{3}H]Aspartate: effect of kainic acid 29
Astrocytes: glutathionine content 23
Atrial natriuretic factor (ANF-28) 177
Autoreceptors: and noradrenaline synthesis 329
  for dopamine 61
  of dopamine, effect of antidepressants 61

Batrachotoxinin-A [^{3}H]benzoate: binding to sodium channel 487
Behaviour: effect of α-MSH 85
Benzodiazepine: receptor 91
  receptors on culture neurones 383
Benzodiazepine derivatives: central effects 91
Binding: of atrial natriuretic factor 177
  of batrachotoxinin-A [^{3}H]benzoate 487
  of benzodiazepine to homogenates and cultures 384
  of GABA 91
  of [^{3}H]apomorphine 401
  of [^{3}H]flunitrazepam in insect CNS 287
  of [^{3}H]GABA in insect CNS 287
  of [^{3}H]glutamate 521
  of [^{3}H]5-HT 191
  of [^{3}H]ketanserin 432, 557
  of [^{3}H]neurotensin to retinal membranes 38
  of [^{3}H]pyrilamine and [^{3}H]tiotidine 380
  of [^{3}H]QNB 339
  of serotonin 447
  of [^{35}S]TBIS in insect CNS 287
Biogenic monoamines: localisation and quantification in intestinal tracts 505
Bisquaternary ammonium compound: site on acetylcholinesterase 323

Brain: effect of ethanol 371
[^{35}S]TBPS (t-butylbichychlophosphorothionate): binding to insect CNS 287
BW 284 C51: inhibitor of acetylcholinesterase 323

Calcium: effect on sulfatide transport 265
  effect on tyrosine hydroxylase 171
Cardiovascular system: differentiation of catecholamine neurones 551
Carp: monoamines in intestinal tract 505
Catecholamine secretion 391
Catecholamines: of limbic system 437
  in plasma 373
Caudate-putamen: effect of soman on RNA 121
Cerebral cortex: control in rodent 3
Cerebral ischemia: induces changes in phosphoinositide metabolism 185
Cholesterol ester: in culture glioblastoma cells 499
Cholesterol ester hydrolysases: in culture glioblastoma cells 499
Cholinergic receptors: muscarinic subtypes 337
Choline-O-acetyltransferase (ChAT)
ChAT: characteristics 411
  from mouse and rat brain 409
Cholecystokinin-8: effect on striatal tyrosine hydroxylase activity 493
Cholinergic lesions: alter serotonergic function in neocortex 557
Chromaffin cells 391
Colchicine: effect upon sulatide transport 265
Con A: localisation 393
Convulsive activity: dendrotoxin 11
Culture: of F7 cells 44
  of glial cells 247
  of rat glioblasts 305
  of astrocytes and glioma cells 23
Cysteine sulfinate decarboxylase: properties 315
Cytoskeletal changes: of glioblasts 305

Dendrotoxin: effects on convulsion and neuronal acceptors 11
  monoclonal and polyclonal antibodies 11
Dexamethasone: effect on glial cell enzymes 247
5,7-dihydroxytryptamine: effect on 5-HT$_{1B}$ binding sites 191
Dopamine: analysis by HPLC with electrochemical detection 437
  autoreceptors 61
  in specific synaptosomes 455
  synthesis in rat brain nuclei 423
Dopamine-β-hydroxylase: endocytosis of 391
  localisation 394
Dopamine receptor: partial purification 403
Dopamine receptors: endogenous modulator 401
Dopamine transmission: effect of oxytocin 481
  in limbic structures 481
Dopaminergic activity: effect produced by α-MSH 85
Dopaminergic activity: in cardiovascular system 551

Electric eel: sodium channel 487
Electrophoresis: of brain protein 357
  two dimensional 357

Electrophorus: sodium channel 487
Endocytosis: of dopamine β-hydroxylase 391
of plasma membrane following catecholamine secretion 391
β-Endorphin: immunoreactivity in hypertensive rats 273
Enzymes: for degradation of TRH 103
Epinephrine (see adrenaline)
Ethanol: effects on brain, plasma and monoamine concentration 371
effects on virgin and pregnant rats 371
levels in blood and amniotic fluid 373
Evolution: of myelin proteins 463
Expression: of N-Cam in neurones 539
Extracellular proteins: in hippocampus 56

Fatty acids: long-chain and very long-chain 475
Fetuses: effect of ethanol 371
[^{3}H]Flunitrazepam: binding to insect CNS 287
Flunarizine: interaction with histamine receptors 379

GABA: aminotransferase 512
effect of taurine on metabolism 511
enhanced benzodiazepine binding 386
receptor binding 91
[^{3}H]GABA: binding to insect CNS 287
Glial: neurone interaction 6
Glial cells: effect of hormones on proliferation 247
in culture 247
sterol ester 500
Glia maturation factor (GMF) 305
Glioblastoma cells: cholesterol ester and hydrolases 499
in culture 499
Glioblasts: cytoskeletal changes 305
effect of glia maturation factor 305
Glioma cells: glutathione content 23
Glutamate: effect of taurine on metabolism 511
[^{3}H]Glutamate: binding 521
[^{3}H]Glutamate binding: and anion channels 521
Glutamate dehydrogenase 521
Glutamate uptake: in hippocampus 255
Glutaminase 512
Glutamine synthetase 512
Glutathione: content in cultures of astrocytes and glioma cells 23
Glycerol: incorporation into phospholipids 69
Glycerol phosphate dehydrogenase: in glial cells 247
Glycogen: metabolism in nervous tisue 3

Heparin: acetylcholinesterase interaction 75
Hippocampus: effect of entorhinal cortex lesions 255
extracellular proteins during depolarization 55
glutamate uptake, muscarinic receptors and acetylcholinesterase levels 255
Histamine: receptors 379
HPLC: for measuring acetylcholine 127
of dopamine, norepinephrine and epinephrine 437
Huntington's Disease: serotonin receptors 431
5-Hydroxytryptamine (see serotonin)
5-HT = 5-hydroxytryptamine (see serotonin)
5-HT: control in snail and leech ganglia 2
synthesis in discrete rat brain nuclei 423
5-HT-containing neurones: in leech and gastropods 2
5-HT$_{1B}$: binding sites in substantia nigra 191
Hypertensive: rats 273
Hypertensive rats: binding of atrial natriuretic factor 177
Hypothalamic cell line F7 43
Hypothalamus: β-endorphin immunoreactivity 273
Hypothalamus: interaction of neurotransmitters 155

Ibotenic acid: basal forebrain lesions 557
Implanted semipermeable tubing: alternative to push-pull cannula 55
Inositol lipid: mediates signalling in nervous system 231
Inositol metabolism: in isolated nerve endings 295
Intestinal tract: localisation and quantification of monoamines 505
Ischemia: changes in lipids involved in phosphoinositide metabolism 185

Jimpy mouse: fatty acids and acetyl-CoA 475

Kainic acid: effects on amino acids and [^{3}H]aspartate 29
[^{3}H]Ketanserin: binding 432, 557

Lactate dehydrogenase: in glial cells 247
Learning: at cellular level 43
Leech ganglia: control by 5-HT 2
LHRH: triggering phosphatidylinositol cascade 149
Limbic structures: dopamine transmission 481
Limbic system: analysis of catecholamines 437
Lipoprotein depleted serum: effect on cultured glioblastoma cells 499
Locust: monoamines in intestinal tract 505
Luteinizing hormone releasing hormone (LHRH) 142

Malic enzyme activity: in glial cells 247
Medianosome: concept 155
Median Eminence: nerves in external layer 141
neuropeptides 131, 148
Membrane fluidity 447
Mesolimbic: dopamine autoreceptors 61
Metergoline: effect on dopamine and 5-hydroxytryptamine synthesis 423
Micropunch: samples of tissue for analysis 440
Microsomes: fatty acids and acetyl-CoA 475
Modulation: by membrane fluidity 447
effect of oxytocin on dopamine transmission 481
of serotonin binding 447
Modulator: to dopamine receptor 401
Monensin: effect upon sulfatide transport 265
Monoamines: effect of ethanol 371
in intestinal tracts 505
Monoclonal antibody: to dendrotoxin 11
Morphometrical analysis: of neurotransmitters 155
MPT (O-ethyl-S(2-diisopropylaminoethyl)methyl phosphorothiolate) 323
α-MSH = α-melanocyte stimulating hormone: effect on behaviour and striatal dopaminergic activity 85
injection into substantia nigra or intraventricularly 85
Muscarinic receptors: in hippocampus 255
subtypes 337
Muscle: acetylcholinesterase in childhood myopathies 239
Myelin: and transport of sulfatides 265
Myelin basic protein 465
Myelin: proteins 363, 463
Myelin proteins in evolution 464
Myelin proteolipid protein: acetylation 545
subcellular fractions 545
Myopathies: and acetylcholinesterase 239

Oligodendroglial: plasma membrane antigens 517
Oxytocin: effect on dopamine transmission 481

Peptides: effect on tyrosine hydroxylase 171
Percoll: gradient centrifugation for isolating synaptosomes 455
Phosphatidylinositol 4,5-biphosphate: and receptor transduction 211
metabolism 211
Phosphatidylinositol second messenger system: relation with LHRH 149
Phosphoinositide metabolism: and ischemia 185
in photoreceptors 235
Phospholipase C: relation to agonist-stimulated phosphatidylinositol 4,5 biphosphate metabolism 211
Phospholipid: of isolated nerve endings 295

Phospholipids: in brain subcellular fractions of normal and malnourished animals 69
incorporation of radioactive glycerol 69
Photoreceptors: phosphoinositide metabolism 235
Pirenperone: effect on dopamine and 5-hydroxytryptamine synthesis 423
Pizotifen: effect on dopamine and 5-hydroxytryptamine synthesis 423
Plasma: effect of ethanol 371
levels of catecholamines 373
Polyamines: effects on tyrosine hydroxylase activity 281
Polyclonal antibody: to dendrotoxin 11
Potassium: effect on phospholipids and inositol metabolism 295
Pregnant rats: ethanol effect 371
Presynaptic autoreceptors: desensitisation 329
Proteins: in hippocampus during depolarisation 55
of brain subcellular fractions 357
[^{3}H]Pyrilamine: binding 380

[^{3}H]QNB: binding 339

Receptor: for benzodiazepines 91
Receptors: for neurotensin 35
for serotonin 431
muscarinic subtypes 337
to benzodiazepines 383
to dopamine 341
Release: of amino acids from synaptosomes 29
of neurotensin from retina 35
Retina: identification, release and receptor analysis of neurotensin 35
RNA: changes within neurones caused by soman 121

Second messengers 215
Serotonergic (serotonin): properties in hypothalamic cell line F7 43
Serotonin (see 5-hydroxytryptamine) = 5-HT
Serotonin: binding 447
in specific synaptosomes 455
localisation and metabolism in cultured cells 45
receptors 431
Serotonin function: effect of cholinergic system 557
Snail: monoamines in intestinal tract 505
Snail ganglia: control by 5-HT 3
Sodium channel: binding of batrachotoxinin-A [^{3}H]benzoate 487
in membranes of electroplax 487
Soman: organophosphorus neurotoxins 121
Spermidine: effect of Δ^9-tetrahydrocannabinol 99
in brain regions 99
Sterol ester hydrolase: in glial cells 500
Stress: and noradrenaline synthesis 329
Subcellular distribution of brain proteins 357
Substantia nigra: effect of soman on RNA 121
hyperdensity of 5-HT$_{1B}$ binding sites 191
Sulfatides: transport towards myelin 265
Synaptic vesicles: proteins 363
Synaptosomes: and noradrenaline synthesis 329
isolated by percoll gradient centrifugation 455
isolation of populations containing dopamine or serotonin 455
phospholipid and inositol metabolism 295
tyrosine hydroxylase activity 331

Tachyphylaxis: induced by tyramine 533
in isolated rat heart 533
Taurine biosynthesis: cystein sulfinate decarboxylase 315
Taurine: effect on enzyme metabolising glutamate and GABA 511
Δ^9-Tetrahydrocannabinol: effect on regional brain concentrations of spermidine 99
Thyrotropin releasing hormone = TRH
[^{3}H]Tiotidine: binding 380
Transmitter: mediated regulation of energy metabolism 1
TRH: degradation 103
TRH degrading enzyme 105
TRH metabolites: in rat brain 103
1H-1,2,4-Triazolyl benzophenone derivative: sleep-induce and anxiolytic drug 91
L-Triodothyronine: effect on glial cell enzymes 247
Tyramine: induced tachyphylaxis 533
Tyramine-induced tachyphylaxis: effect of tyrosine 533
Tyrosine: prevents tyramine-induced tachyphylaxis 533
Tyrosine hydroxylase: effect of polyamines 281
in adrenals 281
Tyrosine hydroxylase activity: effect of neurotensin and cholecystokinin-8 493
effect of sonication, dialysis, calcium and peptides 171
in synaptosomes 331

Verapamil: interaction with histamine receptors 379
Virgin rats: ethanol effects 371
